## FRONTEND DEVELOPER

 danylo-morhun

 [danymorhun@gmail.com](mailto:danymorhun@gmail.com)

 +48 537 343 917

 Katowice, Poland

## HARD SKILLS

**Frontend:** TypeScript, JavaScript (ES6+), Vue.js (Options & Composition API), React, Next.js, Vuetify, Quasar, Tailwind, Bootstrap, Material UI, HTML5, SCSS

**State Management:** Redux, Vuex, Pinia

**Build Tools:** Webpack, Vite

**Architecture & Tools:** Microservices, Serverless (Cloud Functions), REST APIs, GraphQL

**Backend Basics:** Python, Django, DRF

**Version Control & CI/CD:** Git (GitHub, GitLab), GitHub Actions, GitLab CI/CD

**DevOps:** Docker (development)

**Design & UX:** Figma, Adobe Photoshop, Adobe Premiere Pro

**Testing:** Jest, Cypress, TDD, BDD, Integration Testing, E2E

**Performance:** Code Splitting, Lazy Loading, Asset Management

## SUMMARY

Frontend Developer with 3+ years of experience delivering complete web applications from design to production. Strong in building responsive UIs, integrating third-party APIs, and improving performance across modern JavaScript frameworks. Experienced in both greenfield projects and legacy codebases, with a focus on clean architecture and usability.

Comfortable taking ownership of features end-to-end. From UI/UX design, through development, to deployment. Currently seeking a frontend role on a product team, working on scalable, real-world applications and growing alongside experienced engineers.

## WORK EXPERIENCE

### FRONTEND DEVELOPER in EZCLOUD

Dec 2021 - Sep 2025, USA (Remote)

**Scanly.** Vue.js + Quasar-based UI for Amazon product comparison. Integrated with Amazon SP-API for real-time pricing and inventory data.

**Amazon P&L Tracker.** Dashboard built with Vuetify to track seller profits. Pulled analytics via Amazon SP-API, optimized performance for large datasets.

**Sendy.** Designed responsive HTML email templates. Managed email delivery and tracking via SendGrid API. Improved engagement through A/B tested templates.

**EZCELL.** Admin panel for phone top-ups using Plivo IVR integration and Cardknox for secure payment processing. Built with React, TypeScript, and Next.js.

**Hayoim Yoim.** React-based tool for scheduling and managing ad campaigns. Used OAuth for user authentication and Google Maps API for location-targeted ads.

**Kosher Supplements.** Developed product listings and shopping cart. API-driven order processing. Improved performance with lazy loading and code splitting.

**Code Quality & Maintenance.** Refactored legacy Vue/React codebases. Adopted TypeScript, conducted code reviews, optimized API calls, and improved overall maintainability.

## EDUCATION

### Master of Science Software Engineering Computer Science

Kherson State University, 2024-2025, Ukraine

### Bachelor of Science Software Engineering Computer Science

Kherson State University, 2020-2024, Ukraine
